WORK EXPERIENCE

Telematics Development Center at the University

Havana, Cuba (2021 - 2022)

Web Programer

- Linked to cybersecurity projects.
- Developed an API and a plugin vulnerability management system in CMS.
- Worked with Laravel and Bootstrap technology.

Desoft (Software Development Company)

Havana, Cuba (01/2023 - 06/2023)

Backend Developer

- Correct failures in the operation of existing projects aimed at government entities.
- Development of the administration panel of the local project management system, using Voyager technology.
- Worked with LAMP (Linux, Apache, MariaDB and PHP), Laravel and teamwork using Git/GitHub.
- Implementation of a banking security system module for credentials and transactions. I used Laravel (Sanctum, API).

Proyecto Espacios

Havana, Cuba (07/2023 - 08/2024)

Computer Engineer / Backend Developer

- Implementation of a business management project (Espacios Management) to link warehouse processes with production and human resources management. To do this, I developed a Rest API to manage the application modules, using Laravel, Bootstrap, LAMP and Git/GitHub technology.
- Administration and maintenance of the company's computer network (Windows server).
- ERP administration (eTES) and training for its use to the company's personnel.
- Hardware and software maintenance.
